

Filipe Fernandes

System Administrator · Infrastructure & Security · Automation

[linkedin.com/in/ffernandes97](https://www.linkedin.com/in/ffernandes97) · Lisboa, Portugal

PROFESSIONAL SUMMARY

System Administrator with 8+ years of progressive experience in enterprise IT infrastructure. Currently managing a hybrid environment of ~100 servers and ~100 users at Sendit, encompassing Kubernetes, Ceph distributed storage, Docker, and Fortinet/WatchGuard security stacks. At Viagens Abreu, led a full end-to-end Microsoft Intune implementation from scratch (100–500 Windows devices), covering Autopilot enrollment, compliance policies, Conditional Access, application deployment, and GPO-to-Intune migration. Strong focus on automation (Ansible, PowerShell, Python), observability (Zabbix, Prometheus, Grafana), security hardening, and ITIL-aligned change management practices.

PROFESSIONAL EXPERIENCE

Sendit

Nov 2024 – Present

System Administrator

Lisboa, Portugal

- Manage Hybrid Azure AD, Active Directory, Group Policies, and Windows Server 2016–2022 environments
- Manage 80+ Linux Ubuntu production hosts via Ansible across 5 product lines; automate IT reporting via Python/Node.js pipeline integrating Jira Cloud API (Excel + PowerPoint generation)
- Build and maintain observability platform: Zabbix, Prometheus, Grafana — dashboards, alerting, capacity planning
- Automated Exchange Online user lifecycle via PowerShell: full offboarding (Distribution Lists, M365 Groups, Shared Mailboxes, RBAC, mailbox delegations), permission/group membership cloning, and scheduled report uploads to SharePoint via PnP and Graph API
- Configure and maintain Fortinet FortiGate, FortiADC, and WatchGuard firewalls plus HAProxy load balancing: VPN, NAT, network segmentation, SSL inspection
- Manage Netgear software-defined switching infrastructure: VLAN configuration, port management, and inter-VLAN routing
- Built internal IT self-service portal (ASP.NET 8 MVC, Windows Authentication, IIS): AD user creation with configurable OUs, password reset/unlock, group management, and Exchange Online Distribution List management via Graph API
- Administer Kubernetes cluster, Ceph distributed storage, and Docker container environments in production (~100 servers, ~100 users)
- Developed containerised video compression service (C#/.NET, Docker): downloads MP4s from SharePoint via Graph API, compresses with FFmpeg (H.264/CRF28), re-uploads to SharePoint on a 2-hour cycle with automated Office 365 email alerting on failure
- Conduct multi-entity vulnerability assessments with OpenVAS (5 org scopes); drive remediation, OS lifecycle updates, and TLS certificate automation
- Apply ITIL-based change management: maintenance windows, rollback plans, and post-implementation reviews

Viagens Abreu, S.A.

Feb 2023 – Nov 2024

System Administrator

Linda-a-Velha, Lisboa

- Led end-to-end Microsoft Intune implementation from scratch (100–500 Windows devices): architecture, tenant configuration, and full rollout
- Configured Windows Autopilot and enrollment profiles for zero-touch device provisioning
- Built compliance policies and Conditional Access rules integrated with Azure AD, enforcing security baselines across all managed endpoints
- Deployed applications (Win32, MSI, Microsoft Store) via Intune, replacing manual software distribution
- Migrated Group Policy Objects (GPOs) to Intune Configuration Profiles, reducing on-premises dependencies
- Managed Windows Server infrastructure: Active Directory, DNS, DHCP, WSUS, File Server, and Group Policy
- Maintained VMware vSphere virtual infrastructure: VM provisioning, resource management, snapshots
- Managed Cisco software-defined switching infrastructure: VLAN configuration, port management, and inter-VLAN routing
- Created and maintained technical documentation: runbooks, wiki procedures, and knowledge base articles

Viagens Abreu, S.A.

Feb 2018 – Feb 2023

IT Support Specialist

Linda-a-Velha, Lisboa

- Provided 1st and 2nd line support for 500+ end-users across a multi-site Windows environment
- Participated in Exchange on-premises to Microsoft 365 migration (500+ mailboxes): mailbox migration batches, DNS cutover, and post-migration validation
- Administered Active Directory, DNS, DHCP, and GPOs; managed full user and device lifecycle (onboarding/offboarding)
- Contributed to Windows Server 2019/2022 upgrade projects; managed WSUS patching cycles

ITEN Solutions (contractor at Viagens Abreu)

Jul 2017 – Feb 2018

IT Helpdesk

Linda-a-Velha, Lisboa

- Hardware and software troubleshooting, Windows workstation administration
- First-line support for Windows-based systems and Microsoft Office tools
- Ticket handling via ServiceDesk platform and issue documentation

ASAE – Autoridade de Segurança Alimentar e Económica

2016 – 2017

IT Intern

Lisboa, Portugal

- Hardware setup, maintenance, and technical documentation
- IT support tasks and internal system operations in a public administration environment

TECHNICAL SKILLS

OS & Servers: Windows Server 2012–2022 · Linux Ubuntu · Linux Debian · RHEL / CentOS

Virtualization & Containers: VMware vSphere · Kubernetes · Docker

Storage: Ceph Distributed Storage · Windows File Server

Microsoft Cloud: Azure AD (Hybrid) · Microsoft Intune · Microsoft 365 · Exchange Online · SharePoint · OneDrive · Microsoft Defender

Automation & Scripting: PowerShell · Bash · Ansible · Python · C# / .NET

Networking & Security: Fortinet FortiGate · FortiADC · FortiClient EMS · WatchGuard · HAProxy · VPN (IPSec/SSL) · NAT · DNS · DHCP · VLAN

Monitoring & Observability: Zabbix · Prometheus · Grafana

Infrastructure Services: Active Directory · Group Policy (GPO) · WSUS · PKI / TLS Certificate Management

Security & Compliance: OpenVAS · Security Hardening · DR & Backup Policies · Incident Response

Practices & Methodologies: ITIL (Incident/Change/Problem Mgmt) · Technical Documentation · Runbooks & Wikis · Confluence · Change Management · Maintenance Windows · Rollback Planning

AI & Productivity: Claude · ChatGPT · GitHub Copilot · AI-assisted Scripting · Prompt Engineering · Workflow Automation with LLMs

PROFESSIONAL DEVELOPMENT

Continuous Learning — Networking, Fortinet, and Security courses (Udemy / Pluralsight / Coursera)

Personal Homelab — Proxmox VE hypervisor hosting Linux and Windows VMs; Docker-based self-hosted services for testing infrastructure patterns, automation playbooks, and monitoring stacks in a production-like environment

EDUCATION

Técnico de Programação e Gestão de Sistemas Informáticos

2014 – 2017

Escola Secundária Augusto Cabrita, Barreiro

LANGUAGES

Portuguese: Native · **English:** Professional Working Proficiency
